

### REMARKS

Claims 1-15, 17-33 and 38 were allowed. Claims 6-7 are amended to correct an informality. No new matter is added. Reopening prosecution or further examination is not required as the amendments are directed to matters of form that do not affect the scope of the claims.

It was stated on page 3 of the Notice of Allowability, "The references cited in the Search Reports PCT/GB2004/00127 (07/2004 and 07/2005) have been considered, but will not be listed on any patent resulting from this application because they were not provided on a separate list in compliance with 37 CFR 1.98(a)(1)." This statement is incorrect. All references cited in the Int'l Search Report have been listed on Form PTO-892 by the Examiner or Form PTO-1449 by the Applicants. Their consideration during prosecution was acknowledged by the return of initialed copies of those forms. Therefore, all references cited in the Int'l Search Report should be listed on the patent issuing from this application. If the Examiner disagrees and continues to allege that the requirements were not satisfied, she is invited to contact the undersigned to clarify what should be done prior to issuance of the patent.

Early issuance of this patent is earnestly solicited because Applicants submit that the claims remain allowable for the reasons of record. Do not hesitate to contact the undersigned if any further information is required.

Respectfully submitted,

**NIXON & VANDERHYE P.C.**
